DETAILED ACTION

Response to Amendment

1. The amendment filed on October 25, 2007 has been entered.

Claims 1 – 9 are pending.

Claims 1 – 9 are rejected.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1 – 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to describe the limitation “generating a plurality of slot sequences utilizing at least one selectively weighted value” in such a way as to enable one skilled in the art to make and/or use the invention. First, the specification fails to define k and m. Second, the specification fails to describe how slot sequences are generated from the equations shown on pages 5 and 6.

Response to Arguments

4. Applicant's arguments filed on October 25, 2007 have been fully considered but they are not persuasive.

In response to the 112 1st paragraph rejection as applied to claim 1 as failing to comply with the enablement requirement, Applicant argues that one skilled in the art would clearly understand that sequences ordering the available timeslots are determined based on altering the weight of the figure of merit and arranging the timeslots in order of decreasing figure of merit (3rd paragraph on page 6 of Remarks). The Examiner respectfully disagrees. The specification does not describe the claimed invention in an adequate manner that would enable one skilled in the art to understand and make use of the invention; and there is no evidence that would support the assertion that one skilled in the art would be able to clearly understand and make use of the invention. Applicant further argues by explaining the meanings of the parameters "k" and "m", which are parameters that are used in the claimed invention (4th paragraph of page 6 of Remarks). However, such definition about the parameters "k" and "m" was not in the original specification, thus is considered as new matters.

Allowable Subject Matter

5. Claims 1 - 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, first paragraph, set forth in this Office action.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
